### DETAILED ACTION

Claims 1-75 are pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-75, drawn to compound of formula shown in claim where X' and X are nitrogen, composition and method of use, classified in class 544, subclass 182, class 514, subclass 242.
- II. Claims 1-75, drawn to compound of formula shown in claim where X' is nitrogen and X is carbon, composition and method of use classified in class 544, subclass 333, class 514, subclass 256.
- III. Claims 1-75, drawn to compound of formula shown in claim where X' is carbon and X is nitrogen, composition and method of use, classified in class 544, subclass 405, class 514, subclass 252.10.
- IV. Claims 1-75, drawn to compound of formula shown in claim where X' and X are carbons, composition and method of use, classified in class 546, subclass 268.1, class 514, subclass 336.

Upon electing an invention, applicants should also elect a species from that invention for examination.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are independent and distinct from each other because they are directed to dissimilar compounds with varying cores such as 1,2,4-triazine versus pyrimidine with versus pyrazine versus pyridine. Consequently, the groups have different classifications and require separate prior art searches. Art which may render

Art Unit: 1624

obvious or anticipate one of the groups would not necessarily do the same for the other group. Each can support a patent, as the compounds of each group are capable of being utilized alone not in combination with other members listed in the Markush group.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

In view of distinct nature of each of the inventions, the restriction is set forth in writing.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
